Career Objective

Computer Science and Business Systems undergraduate (CGPA: 8.9) with strong foundations in Machine Learning, Full-Stack Development, and Cloud Technologies. Experienced in building AI-powered web applications using React.js, FastAPI, Spring Boot, MySQL, Docker, and Generative AI. Passionate about developing scalable software solutions and Seeking a Software Development, Backend Development, or Machine Learning Internship where I can apply my technical skills to build scalable and impactful software solutions.

Education

SRKR Engineering College

2024–2028

B.Tech in Computer Science and Business Systems

CGPA: 8.9/10.0

Technical Skills

Programming: Python, Java, C

Machine Learning: Pandas, NumPy, NLP, TF-IDF, SMOTE

AI Tools: Gemini API, Generative AI,

Databases: MySQL, SQL, JDBC

Web Technologies: React.js, FastAPI, Spring Boot, HTML, CSS, JavaScript

Cloud & DevOps: Docker, Google Cloud Platform (AWS), Git, GitHub

Core Subjects: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Tools: VS Code, Jupyter Notebook, Google Colab

Experience

Software Development Intern — Miracle Software Systems

May 2026

- Developed full-stack applications using Java, Spring Boot, Python, FastAPI, React.js, MySQL, JDBC, and REST APIs.
- Built CRUD-based backend services, integrated frontend applications, and implemented secure authentication.
- Developed containerized applications using Docker and gained exposure to Google Cloud Platform (AWS)
- Tested, debugged, and optimized software modules to improve application performance and reliability.

Full Stack Vibe Coding Intern — Swecha

2026

- Developed responsive full-stack web applications by integrating frontend and backend components.
- Utilized Git, GitHub, and Docker for collaborative development, version control, and containerized deployment.
- Leveraged AI-assisted development tools to accelerate coding, debugging, and feature implementation.

Projects

Smart Learning Platform

- Developed an AI-powered learning platform using React.js, FastAPI, MySQL, JWT Authentication, and Docker.
- Integrated Gemini API for AI-generated content, quizzes, and summaries.
- Implemented REST APIs, JWT authentication, and progress tracking..

Fake News Detection Using Machine Learning

- Built an NLP-based fake news detection model using Python, TF-IDF, Scikit-learn, and Logistic Regression.
- Processed 40,000+ news articles and achieved 92% classification accuracy.

Certifications

Amazon Future Engineer (AFE) Bootcamp – Zuvy NavGurukul (Top Performer) • Machine Learning Fundamentals (GeeksforGeeks) • Java Programming Fundamentals (GeeksforGeeks) • Programming Essentials in Python (Cisco) • Programming Essentials in C (Cisco) • Quantum Fundamentals (WISER) •
